## ABOUT MYSELF

I am currently looking for an **end-of-course internship** in the domain of telecommunications. I would love to work on something related to **product development**, **product strategy**, **data analysis, IoT** or **big data**. Internet + products + people + beta mindset.
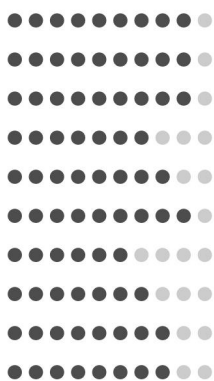

Throughout my studies, I have been part of several **projects** where I assumed **different roles** depending on the demands. Most of the groups were composed of people coming from **different countries and cultures**, especially those at IMT Atlantique (France).

In September 2016, I started a Master of Engineering in France seeking knowledge of **Internet of Things** and latest technologies in **Computer Networks**. I am also taking **engineering economics** and social sciences courses to be applied in **project management** and **business processes**.
